1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "water bearing domestic and appliance and the "retainer" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 15-20 and 22-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Woehler (U. S. Pat No. 3,702,680).

Re claims 15 and 22 for example, note that Woehler is cited disclosing water-bearing domestic appliance (dishwasher) comprising:

a retainer (as at 10) for retaining items to be subjected to a liquid treatment: and
a drainage pump (26) having an inlet through which liquid enters the drainage pump, an outlet through which liquid exits the drainage pump, a pump impeller (40) for conveying liquid along a passage through the drainage pump extending from the inlet to the outlet, and a separate chamber (32) located upstream of the pump impeller relative to the direction of flow of liquid through the passage, the separate chamber having an internal diameter and an external diameter and having respective radial bores (34, 30) on its external diameter and in the vicinity of its internal diameter.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 21 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woehler in view of Germant'329 (Germany 27 05 329)

Claims 21 and 28 define over the applied prior art only in the recitation of the pump being used in a washing machine. Germany'329 is cited disclosing the concept of a

pump being designed for either a dishwasher or washing machine. It therefore would have been obvious to one having ordinary skill in the art to modify pump in Woehler, to be employed in a washing machine as taught by Germany'329, for the purpose of saving the expense of a separate pump. It is old and well known to construct to machine components that are for use in other machines of similar functions and constructions.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In Jennings, Sebens, Schmidt, Ohlsson et al., Fisher et al., Malchow, Japan'964, Japan'135, Japan'890, note the pump means..
